## MedInformatix Names New President of Ambulatory Client Advisory Board

Los Angeles, CA – (December 30, 2016) [Electronic Health Records](#) innovator [MedInformatix](#) announced today that Erin Hundley, Clinical IT Director at White’s Pediatrics in Dalton, Georgia, has been elected president of the Ambulatory Chapter of the company’s Client Advisory Board for a two-year term.

The board advises MedInformatix leadership, product development and technology teams on product enhancements, regulatory requirements and customer support initiatives, as well as fosters engagement and best practices collaboration among members of the larger MedInformatix client community. Meetings are convened throughout the year and at the annual MI user summit, where a joint meeting is held between the ambulatory and radiology chapters.

“I am humbled to receive this vote of confidence from my peers, and I look forward to guiding our deliberations for the next two years,” said Hundley. “With the world of healthcare constantly changing it is my hope the advisory board will serve as a reliable platform for information sharing, idea generation and decision making that keeps the MedInformatix client community on the leading edge of EHR innovation and delivery. This will be our focus.”

“White’s Pediatrics is a longtime customer of MedInformatix and a founding member of our advisory board initiative,” said Chris Bruns, product development manager and board liaison at MedInformatix. “I know our board will benefit from Erin’s insight and leadership in the coming year and I am anxious to work with her and all our clients as we continue to innovate and deliver tomorrow’s EHR technology today.”
