

Controlled Substance Medication Refill Policy

Due to federal and state laws, controlled substances such as Ritalin, Concerta, Adderall, certain pain medications, etc. can only be dispensed 30 days at a time with no refills.

In addition, a patient who is prescribed medications for ADHD is also required to visit their physician every 3 months for monitoring purposes. Between appointments we will only refill prescriptions on a monthly basis. You will need to call our office or use our Patient Portal to request a refill, allowing 48-72 hours to process the request.

All controlled substance prescription refills will be sent to your pharmacy electronically.

Please note that if your child does not keep his/her appointment, he/she will not receive a refill.

By signing below, I acknowledge that I have read and understood the above policy and agree to abide by it.
